The annual grinding season starts in November and ends in May depending on the quantity of sugar cane supplied to the mills. The largest factory is Kaset Thai with production capacity of 40,000 tons cane per day while the smallest one is Uttaradit with production capacity of 2,683 tons cane per day.

Three kinds of sugar are produced in the country as follows :

- (1) Raw Sugar for export mainly produced by Defecation Method
- (2) Plantation White Sugar for local consumption mainly produced by Carbonation Method
- (3) Refined Sugar for domestic consumption and export mainly produced by Carbonation and Ion Exchange Resin and Activated Carbon Method.

The remained sugar from domestic selling is exported by 7 exporting companies which are as followed :
